Fall/Winter 2013 Newsletter

Fall COLOR 2013...wear with *glowing skin* as your best accessory.

Introducing the
2013 COLOR OF THE YEAR

**PANTONE® 17-5641
Emerald**

Whether you choose to wear the color of the year, emerald, or cobalt blue or shades of grey, your best accessory will be glowing skin. As we age, our skin appears to be dull and we lose that youthful glow. Certain products along with cosmetic procedures can help you regain that glow. The Cosmetic Center offers free skin care consults with our aestheticians who can recommend customized skin care regimens and procedures which can help you achieve that glow.

Glycolic acid or polyhydroxy acid (for sensitive skin) will rejuvenate the skin, improve tone and texture and are found in several products; higher strength glycolic acid is also available in professional peels as well. Vitamin A derivatives such as tretinoin (Retin-A/Renova) or retinaldehyde (Retrinal) will speed up your cell turnover process, improve tone and texture, minimize the appearance of fine lines and wrinkles and fade pigmentation. Antioxidants such as vitamin C, green tea and coffeeberry treat the photodamage you have already received and prevent new photodamage. Pigmentation balancing peels are also very beneficial and will further target discoloration and therefore, brighten the skin.

Medium Depth Chemical Peel

If you are looking for a procedure that brightens the skin, removes brown spots, softens wrinkles and improves mild acne scars, then a medium depth chemical peel may be right for you. Fall and Winter are the best time to have a medium depth chemical peel because very limited sun exposure is required. Retin-A® (tretinoin) is often prescribed two weeks before the peel to exfoliate the face. It is also beneficial to precede the medium depth chemical peel with a series of glycolic acid peels to prep the skin for the procedure. During the peel, two chemical solutions are applied to the face causing a warm, stinging sensation that lasts for a few minutes. Most people tolerate the process very well. Afterwards, plan for a week of down time.

New Product—NeoStrata® Line Lift

NeoStrata® brings us this innovative SynerG System which is a two step treatment specifically targeting deep wrinkles and lines that do not respond to an antiaging skin-care regimen alone. Formulated with revolutionary Aminofil technology to synergistically build skin's natural volume and visibly reduce the appearance of deep lines and wrinkles (such as scowl lines, furrows, crow's feet and smile lines) resulting from UV induced photodamage and repetitive facial expressions.
