# DERMATOLOGY ASSOCIATES COSMETIC CENTER

## Procedure of the Month

### Rejuvenating Glycolic Acid Peels

Glytone peels are part of a comprehensive treatment program for younger, healthier looking skin. Glycolic acid peels are clinically proven and effective in reducing skin aging effects:

- Fine line and wrinkles
- Uneven skin tone and texture
- Photo damaged skin

Glytone peels range in concentration from 30% to 70% free glycolic acid combined with very low pH values, allowing for maximum efficacy.

## Product of the Month

### Glytone Mini Peel Gel

Glytone Mini Peel Gel is an at-home peel formulated with 10.8% free glycolic acid. It is a perfect bi-weekly booster that can be incorporated as part of any skincare regimen.

#### Benefits Include:

- Improves skin texture and exfoliates
- Enhances exfoliation at home between in-office glycolic peels

#### Directions for use:

- Apply a thin layer to cleansed face and neck.
- Neutralize after 10 minutes with warm water splashes. Pat skin dry.
- Apply 2-3 times per week or as needed.

For a limited time we have a Mini Peel Gel Kit for \$50, with this purchase you will receive a free Glytone peel treatment in our office.
