Tips for Preparing Your Skin for Colder Weather

- Continue to use sunscreen daily on any exposed areas. This is important because the sun's reflective power is harmful year round.
- Use a cool mist humidifier to prevent the air in your home from becoming dry. Dry air can cause many skin disorders to become irritated.
 - Begin switching from lotions to creams to prevent dryness.
 - The fall and winter months are the best time to receive laser treatments.
- Shed wet clothes and shoes immediately. Wet clothing can cause skin irritation and disorder flare ups.

In the Cosmetic Center we have several products to help your skin survive the winter months!

Procedure of The Month Intense Pulse Light

IPL treats many types of skin problems

- Sun damage: Wide areas of pigmentation on face, neck, chest, and other areas
- Sunspots: Pigmented lesions, also known as age spots
- Rosacea: General inflammation of the cheeks and face
- Spider Veins: Individual vessels on the face, which can be red, blue, or purple in color

IPL is a very safe and non invasive procedure, with little to no down time. These appointments are generally quick and allow you to return to work immediately.

Product of The Month Antioxidants

In the cosmetic center we have several different types of antioxidants to chose from. There are several great benefits to using antioxidants on a daily basis.

- Prevention of future damage
- Repair damage that has already accrued
- Help minimize fine lines and wrinkles over time
- Helps boost the skin's support structure

Come to the Cosmetic Center and allow our well trained staff to find the perfect antioxidant for your skin type.
