## Introducing New Eye and Lip Peel by Glytone

Glytone has introduced a new peel for the eye and lip area. The peel is a chemical exfoliation solution specifically formulated for rejuvenating the Eyes and Lips. Composed of Lactic Acid 15% and Trichloroacetic Acid 3.75%, the peel will target mild to moderate hyperpigmentation and photo aging of the eyes and lips. For maximum results, you should have a series of 4 peels, 1 to 2 weeks apart and no more than 2 series within one year. Individually, the eye and lip peel will be \$60 per treatment, or you can add on to a glycolic peel for \$45 per treatment.

## Fake Bake Products Good Alternative to Indoor Tanning

Studies have found a 75 percent increase in the risk of melanoma in those who have been exposed to UV radiation from indoor tanning (from the American Academy of Dermatology website: <http://www.aad.org/skin-care-and-safety/skin-cancer-prevention/indoor-tanning/the-dangers-of-indoor-tanning>). Fake Bake Sunless Tanning Products give you a sun-kissed appearance and are a safe alternative to indoor tanning and sunbathing. This product line is guaranteed not to have a bad odor, streak, turn skin orange, or stain your clothes. We carry a wide array of Fake Bake products.

## Practice Sun Safety.....

Ocean breeze, palm trees swaying and the sound of waves crashing, pure relaxation . . . Vacation time is fast approaching and let's face it, we are all ready for a trip to a sunny beach. Soaking up that vitamin D feels wonderful but be sure to practice sun safety. Look for sunscreens that contain 7 percent or more zinc oxide and/or titanium dioxide. These ingredients *reflect* rather than *absorb* sun rays and are safer to use during pregnancy and for infants older than six months. Sunscreen should be applied 30 minutes before going out and re-applied often (at least every two hours). Avoid being outdoors during peak hours of sunlight from 10 am to 2 pm. Wear hats with a broad brim and sun protective clothing. Following these sun safety tips can reduce your exposure to damaging UV radiation.

## New Products

### *NeoStrata Skin Active*

***Introducing two powerful new serums formulated to boost your antiaging protocol...***

#### Antioxidant Defense Serum

A concentrated serum designed to strengthen skin's defenses against oxidative damage, the leading cause of skin aging. Boosts a daily antiaging regimen to combat oxidation-induced photo aging. Neutralizes 5 key skin-aging free radicals. Protective antioxidant effects make this ideal for daytime use—can be layered under a moisturizer or sunscreen.

#### Firming Collagen Booster Serum

An advanced serum developed to address loss of firmness due to increased degradation and slowed collagen production in aging skin. Complements a daily regimen and boosts skin's natural rejuvenation cycle to enhance and preserve natural collagen. Targets 3 mechanisms of action to maximize collagen for skin that is smoother and firmer. Ideal for reparative nighttime use—either alone or under a moisturizer.
