Practice Sun Safety.....

Ocean breeze, palm trees swaying and the sound of waves crashing, pure relaxation . . . Vacation time is fast approaching and let's face it, we are all ready for a trip to a sunny beach. Soaking up that vitamin D feels wonderful but be sure to practice sun safety. Look for sunscreens that contain 7 percent or more zinc oxide and/or titanium dioxide. These ingredients *reflect* rather than *absorb* sun rays and are safer to use during pregnancy and for infants older than six months. Sunscreen should be applied 30 minutes before going out and re-applied often (at least every two hours). Avoid being outdoors during peak hours of sunlight from 10 am to 2 pm. Wear hats with a broad brim and sun protective clothing. Following these sun safety tips can reduce your exposure to damaging UV radiation.

Fake Bake Products Good Alternative to Indoor Tanning

Studies have found a 75 percent increase in the risk of melanoma in those who have been exposed to UV radiation from indoor tanning (from the American Academy of Dermatology website: <http://www.aad.org/skin-care-and-safety/skin-cancer-prevention/indoor-tanning/the-dangers-of-indoor-tanning>). Fake Bake Sunless Tanning Products give you a sun-kissed appearance and are a safe alternative to indoor tanning and sunbathing. This product line is guaranteed not to have a bad odor, streak, turn skin orange, or stain your clothes. We carry a wide array of Fake Bake products.
